

# Partner with AuDMD EDGE to deliver a higher level of hearing health services within your practice.

Currently the United States has more than 30 million individuals with clinically significant hearing loss. Studies show that approximately 80% of those individuals go untreated every year. The AuDMD EDGE program was created to help practices address the needs of this growing population.

AuDMD EDGE helps practices increase their bottom line by providing tools, support, and practice savings to build and maintain a successful hearing healthcare program. AuDMD EDGE will assist you through the process of integrating a hearing program into your practice.
