easyTek® how-to guide

signiausa.com/easytek
easyTek

1 Multi-function button
2 LED status indicator (orange, green, blue)
3 Neckloop (acts as the antenna)
4 Microphone openings
5 USB port for charging
6 Reset button
7 Port for FM receiver
8 Port for audio devices (standard 3.5 mm audio jack)
9 Volume buttons

LED status indicators:
- Bluetooth®
- Power
- Battery
Wearing easyTek properly

In order to function correctly, the easyTek must be worn with the neckloop around the neck. The neckloop is also the antenna.

- Unplug one neckloop plug and place the neckloop loosely around your neck ①.
- Insert both neckloop plugs all the way ②.

Turning easyTek on/off

- To power on: press until the green LED turns on. This takes approximately 2 seconds
- To power off: press until the green LED fades off. This takes approximately 2 seconds.

easyTek out of the box pairing

The hearing instruments must be paired with the easyTek. After the pairing process is completed, the connection is automatically established when the hearing instruments and easyTek are turned on.

Pairing

- Open battery doors of hearing instruments. Place easyTek around neck with neckloop. easyTek should be “off”.
- Press Multi-Function Button (MFB) on easyTek until green LED is flashing
While green LED is flashing, close battery door of hearing instruments

Pairing is complete when green LED stops flashing (audible alert) - easyTek is ready to use

Note with initial activation only: Blue light will now flash to allow for pairing of Bluetooth phone. If phone is not present, press MFB to stop blue light flashing and end pairing search.

Pairing Siemens transmitters

Before first use

• Charge transmitter before first use by connecting the transmitter with the power plug to a power supply.
• The LED shines red while charging.
• Charging time is about 5 hours.
• Make sure that a hearing aid that has been paired is turned on.
• Every Siemens transmitter must be paired once with easyTek. You can use up to two Siemens transmitters.
• Turn on easyTek and Siemens transmitters.
• Press MFB, and simultaneously for about 5 seconds; easyTek LED flashing, then “on” - transmitter LED flashing, then solid blue. Your easyTek has been paired to the transmitter.

Remote control functions

• Volume changes: Press or <1 second to adjust step by step or press and hold until desired volume is reached.
• Hearing program changes: Press and release 1-2 seconds until desired program is reached. (This function is not available during audio streaming, for example when you are using easyTek to listen to the TV or to music through your MP3 player.)
• Turn on/off (standby): Press and simultaneously for >3 seconds. easyTek will then turn off.
Audio streaming functions

▶ To begin streaming for:
  • Bluetooth audio devices: Turn Bluetooth connection on device. Select ‘play’ on the audio device.
  • For standard line-in devices: Plug in the device to the audio line-in port of easyTek. Select ‘play’ on the audio device.
  • For FM: Plug in the FM receiver to the FM input port of the easyTek. Turn on the FM transmitter.
  • For Siemens transmitters: Double-press 🎧.
▶ To change volume: Press + for volume up or − for volume down.
▶ To mute hearing instrument microphones: Press + and − simultaneously for <1 second.
▶ To stop audio streaming: Press 🎧 for 1-2 seconds until blue LED turns off.
▶ To toggle between two Siemens transmitters: Double press 🎧.

Using easyTek with cell and landline phones

easyTek allows the hearing instruments to act as a wireless headset when using a Bluetooth technology-enabled phone.
The easyTek microphones convey wearers voice to the other party.

Pairing Bluetooth devices

▶ Turn on Bluetooth device and easyTek
▶ Press MFB 🎧 and + simultaneously for about 5 seconds blue LED flashes
▶ Use Bluetooth device to search for other Bluetooth devices - select easyTek
▶ Pairing is complete when LED turns solid blue 🌄, then turns off - easyTek is now ready for audio streaming
## Further information:

| Accept / end call | Press for 1-2 seconds  
| Alternative: Use phone's accept/end function. |

### Incoming calls:
- Hearing instrument plays a ring tone and blue LED flashes.
- easyTek cannot be turned off during a phone call.

### Outgoing calls:
Hearing instruments automatically connect with phone when placing a call.

Some phones do not support this function. In this case:
- Stop or disconnect all other audio devices.
- Press + and - together briefly to establish the connection manually.

| Reject a call | Press >3 seconds  
| Alternative: Use your phone's reject function.  
| This function is not supported by all phones. |

| Volume | + or -  
| Press + to increase volume; - to decrease volume. |

| Sound mixer | + and -  
| Press both buttons simultaneously to switch between the following input signals:  
| Caller's voice and hearing instrument microphone  
  - you hear both the call and ambient noise  
| Caller's voice only - the ambient noise is turned off |

| Transfer call | double-press  
| Transfers phone call from easyTek to the phone - conversation comes through the phone  
| From the phone to the easyTek - for hands free conversation using easyTek and the hearing aid |
Connect the audio device with easyTek - directly or wirelessly. easyTek wirelessly transmits (streams) the audio signal to your hearing instruments.

The audio signal is streamed through the hearing instruments turning the hearing instruments into a personal headset.

**Supported devices**

The following devices can be connected:

- *Bluetooth-enabled phones* (up to two).
- *Bluetooth audio devices*, such as tablet, PC, stereo, etc.
- *Audio devices* (with standard 3.5 mm audio jack).
- *Siemens transmitters* (up to two). Enable wireless audio streaming for devices that do not support *Bluetooth*.
- *FM receiver*. Enables use of FM system even if hearing instruments do not have audio input.
Connecting easyTek transmitter to your television

Use the RCA adapters with the analog outputs on your TV, cable to satellite dish console, or A/V receiver to connect the transmitter.

If needed, a digital-to-analog converter can be purchased.

Using the Transmitter

- On/off switch
- Sound level
- Socket for power plug
- 2.5 mm stereo socket
- LED
easyTek App.

Turn your smartphone into an easyTek control center.

The easyTek App™ provides convenient operation of the hearing instruments via an Android smartphone, iPhone, or tablet.

Whether watching TV, listening to a favorite song, or talking to a friend on the phone - control is right at your fingertip.

Prerequisites for using the app:

■ The easyTek app works with the easyTek.
■ The smartphone/tablet must be within Bluetooth operating range approximately 32 ft (10 m).

Prerequisites for download and installation:

■ Smartphone or tablet must have access to the Internet.
■ Create or use established account for the Google Play Store (Android smartphone/tablet) or for the App Store (iPhone or iPad).
The easyTek App will control volume and acoustic programs if the easyTek is left behind.

## App download.

1. Make sure you (or your patient) has an Android or iOS smartphone and an account on the Google Play Store or Apple App Store.

2. Log into the account on the Google Play Store or Apple App Store with your Android or iOS smartphone. Find the easyTek App or touchControl App.

3. Follow the instructions until the app is installed on your Android or iOS smartphone.

4. **For Dispensers:** Show your patient how easy it is to control their hearing instruments via the respective app.
